ADOBE READER HOW TO'S

ADOBE READER HOW TO'S

The main reason why people get Adobe Reader is to be able to view PDF files they get from others or download from the web, it is available for Windows, Mac OS X, Android and iOS. And no matter what computer, operating system, or browser you are using, our PDFs work best with Adobe Reader (it's free!) as it allows you to type directly into the document and save your work.

If you want to enjoy Adobe Reader and make use of its cool features, you can get it for free here: <https://get.adobe.com/reader/>, just make sure to use the latest version to avoid issues. Adobe reader will enable you to edit the Work Sheets, Done for You Sheets, and Tick Sheets that are available for download on the site. Adobe does not always push through updates automatically or send notifications about new versions, so when in doubt definitely double check your version!

Finally, you can set up Adobe Reader as the default choice for PDF downloads. For the MAC instructions, [visit this site](#) and if you are working on a PC, [visit this site](#).
